

REMARKS

Applicant appreciates the examiner's review of the present application and indication of allowable subject matter, and request reconsideration in view of the preceding amendments and the following remarks. Claims 1-14 and 17 are pending in the present application.

The examiner has objected to the drawings as failing to include the reference numerals 320 and 280. The present amendment amends paragraphs 94 and 95 of the specification to delete reference to these numerals which were included by clerical error and are not necessary for a full description and understanding of the present invention.

The examiner has also objected to the abstract as containing the legal phraseology "means". The present abstract eliminates that word. Accordingly, given the enclosed amendments, the present application should now be in condition for allowance. The examiner is invited to telephone the undersigned, Applicant's attorney of record, to facilitate advancement of the present application.
